

New Cxbladder® Patient In-Home Sampling Program in response to the Coronavirus (Covid-19)

March 17, 2020

A Message from Pacific Edge Diagnostics USA CEO, Jackie Walker

At Pacific Edge Diagnostics, as we continue to monitor the Coronavirus pandemic, taking the necessary precautions to protect the health and safety of our employees, our customers, and our patients is our top priority.

We want to assure you that we are committed to helping you and your patients who may benefit from the valuable information that our Cxbladder tests offer. To that end, we have developed a Patient In-Home Sampling Program that will allow your patients to self-sample without the need for them to leave their home. For those of you using telemedicine or contemplating a telemedicine program, we can work with you to ensure timely delivery of results in conjunction with your scheduled telemedicine patient visit.

While we have asked all non-essential staff to work remotely from home, our essential lab staff will continue to operate at full capacity while adhering to all safety procedures and practices. Our lab will remain open and we are processing samples every business day. As the number one recurrent cancer, we know that Bladder Cancer will not take a break during this time, and our lab will not take a break either. We are here to help you and your patients.

For more information about Cxbladder In-Home Sampling for Hematuria Evaluation or Bladder Cancer Surveillance, please contact our Customer Service Team at 1-855-292-5237 (1-855-CXBLADR).
