TELL CONGRESS: You Want Options & Price Transparency For Health Care

Everyday Americans, like you, can let your representative know that you back policies that increase your options and provide greater cost transparency for health care.

HERE ARE FOUR THINGS YOU CAN SAY TO YOUR CONGRESSPERSON:

- 1** You expect hospitals to follow new rules to provide transparent pricing information to patients.
- 2** Congress should level the playing field between hospital and independent physician practices, so that independent physicians can continue to provide less costly, high-quality care to people in their communities.
- 3** Government health care plans, like Medicare, should reimburse health care providers equally for the same services.
- 4** You want telemedicine to remain an option post-pandemic.

Visit [congress.gov/contact-us](https://www.congress.gov/contact-us) to find out how to email or call your Congressional representative.

As the leading voice of independent urology group practices in the United States, LUGPA believes in a patient's right to choose their physician. LUGPA actively educates policymakers to ensure increased accessibility, price transparency and a fair and competitive provider marketplace.
