Location TBD

Resident & Fellow Educational Programs

“REAL WORLD UROLOGY WORKSHOPS”

LUGPA
Integrated Practices
Comprehensive Care

Specialty Networks
Powered by PPS Analytics

Resident & Fellow Educational Programs “Real World Urology Workshops”

- > Help Urology Residents get more prepared and more familiar to what life in the “Real World” of Private Practice Medicine looks like
- > Create a live educational workshop to Bridge that Gap
- > Establish a network of Residents and Fellows who are interested in private practice, and help make that connection

The Mission | Resident & Fellow Educational Programs “Real World Urology Workshops”

Educate urology residents and fellows on topics that are important to urologists but exist outside the standard curriculum.

- > Not to overrule or replace academic curriculum, but to complement
- > Not to provide any industry bias.
- > Topics may overlap, but goal is to provide complementary teaching

In doing so, we hope that urologists coming out of training will be immediately impactful and valuable to their groups, which is mutually beneficial.

The Content | Resident & Fellow Educational Programs “Real World Urology Workshops”

- > Real-World Urologic Oncology Care in the Urology Setting
- > In-Office Procedures and Diagnostics in the Real-World
- > Call Coverage, Billing and Coding
- > Partnership tracks & Ancillary Revenue Business Models
- > Community-Based Urology Footprint
- > Private Equity in Urology
- > What is LUGPA and what can it do for me?
- > Institutional Urology and Academic Centers
- > Patient Touch 101 – How to develop a lifelong relationship

Program Objectives | To Help Set Up Young Urologists for Early Career Success

Help Future Urologists...

Better understand the topics important to their tenure in their careers, and obtain a good grasp on what they want to do after training.

Help Current Practice Leaders...

Meet young, talented Urologists and learn what they are looking for in their careers.

Possible Content Modules

- > **Real World Oncology Care in the Urology Setting** – Clinical updates in Advanced Prostate Cancer, Bladder Cancer, and Renal Cancer therapeutics.
- > **In-Office Procedures and Diagnostics in the Real World** – Minimally invasive therapies, PSMA/PET, Genomic Testing, and Latest Peyronie's Disease treatments.
- > **Call Coverage, Billing and Coding, Partnership tracks, Ancillary Revenue Business Models**
- > **Community Based Urology Footprint** – Large, medium and small practices. Centralized, decentralized, pod-based, multi-specialty, and private equity practices. Where do I fit in?
- > **Private Equity in Urology** – What is the current landscape and future outlook, and what does it mean to the Urology workforce?
- > **What is LUGPA?** How does my involvement in Large Urology Group Practice Association help me in my long-term career, and how can I get involved early on?
- > **Institutional Urology and Academic Centers** – Is this my best employment path?
- > **Patient Touch 101** – How to interact with patients in order to form a solid foundation of care.
